

Tenting Groups: COVID UPDATE

Tenting will be allowed as long as the Case # per 100,000 remains below 50 for Washington County.

For tenting, unless it was weather or COVID related, we could accept a cancellation up to a week out. If we are expecting severe thunderstorms, our county COVID numbers are unsafe, or your leadership must quarantine for COVID reasons, we would have no issues with cancelling within the week.

The penalty for cancelling within a week is the cost of the toilet rentals.

All tenting groups should be in cohorts of 25 or less. Tenting cost is \$5 per person/per night.

One toilet will be assigned for groups of 25 or less. Cost is \$35 per group.

Toilet will be cleaned and disinfected prior to group use. Manidokan will check that hand sanitizer is full in the unit. Toilet will be labeled to be used ONLY by that assigned group. Each group will be told to ONLY use their own toilet.

Manidokan will disinfect table-tops, trash and recycling cans, and fire bucket prior to group use.

Manidokan will provide firewood and one full bucket of water.

Manidokan will allow hiking for yellow, blue, and low ropes trails only. Tenters will be instructed not to sit down at any other pavilion and not to touch any of the low or high ropes adventure areas or equipment.

Red Trail will only be used by SunMoonHill Tenting Group

Tenting group will start with a stock of fuel wood. Other downed wood in the forest can be burned as well, or you may request additional wood from Manidokan staff.

Tenting groups may NOT enter or walk through the cabin/recreation areas of Manidokan.

Manidokan Requires:

Tent group leader provides Manidokan with a plan for social distancing and contagious disease prevention, prior to group arrival.

Tent group leaders has a list of names and contact info for each person tenting.

Each tenter has a mask and carries it on their persons at all times on the campground.

Tenters wear masks when within 6-ft of person outside of their group and when Manidokan staff facilitate activities.

Tenting group wipes water pump handle off before and after use with disinfectant.

Tent group leaders have a thermometer with their first aid kit.

Tent group leader reports any temperature of 100.4F of a participant to Manidokan director/representative and sends that person home.

Tent group leaders complete a health screening of all participants and record this so that it can be submitted to camp director on request. Screening questions are attached at the end of the document for your reference.

If anyone shows signs/symptoms of screening while at camp, send that person home and notify Manidokan director/representative.

If anyone in your group tests positive for COVID-19 in the 14 days after your tenting event, please notify the Manidokan director/representative.

Manidokan Recommends:

Shared tent use only by guests who live in the same house or who have quarantined together.

Each tenting guest bring their own silverware and plate wear for meals or use disposable/compostable products.

Tent group leaders take temperatures of each participant daily, or at least on arrival, and record it.

Tenters bring additional hand cleaning/sanitizing stations.

Tenters have one person in charge of food/meals

Tent group leaders bring disinfectant spray to use on frequently touched surfaces in the toilet, such as seat, door, door latch, toilet paper dispenser, etc. throughout their time on site.

All tenters consider wearing masks when using the portable toilet, since it is a highly used/shared space.

SCREENING QUESTIONS

1) Are you feeling healthy and well today? If no, then you will not be able to work or participate today.

2) Have you recently experienced any of the following symptoms?

- Fever of **100.4°F/38.0°C** or higher
- Cough
- Shortness of breath or difficulty breathing
- Chills
- Muscle pain
- Sore throat
- New loss of taste or smell

This list is not all inclusive. Other less common symptoms include nausea, vomiting, or diarrhea.

It is also possible to experience no symptoms at all (asymptomatic cases).

TEMPERATURES FOR STAFF AND PARTICIPANTS WILL BE CHECKED AT ARRIVALMUST BE BELOW 100.4F**

3) Have you recently experienced any of the following Emergency Warning Signs?

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish face or lips

Call 911 or your local emergency facility, and notify the operator that you are seeking care for someone who has or may have COVID-19.

4) Have you tested positive for or had symptoms of COVID-19? IF YES,

- You think or know you had symptoms, you can be with others after 3 days of no fever AND symptoms improved AND 10 days since symptoms first appeared?
- **FOR STAFF:** per CDC guidelines, pending on your healthcare provider's advice and ability of testing, you might get tested to see if you still have COVID 19. If you will be tested, you can be around others when you have no fever, symptoms have improved, and you received 2 negative tests in a row at least 24 hours apart.
- You tested positive but showed no symptoms, if you continue to have no symptoms, you can be with others after 10 days have passed since test and follow above CDC guidelines under STAFF to receive 2 negative tests.
- You showed no symptoms but develop symptoms after testing positive, follow guidance above for those who think or know they had symptoms.

5) Have you been in close contact with a person known to have tested positive for SARS-CoV-2/ COVID-19 within the last 14 days? (Close contact can be loosely defined as within 6 ft of another person for more than 15 minutes).

If yes, then you will not be able to work or participate today. You should stay home for 14 days after exposure based on the time it takes to develop illness. Manidokan policy requires staff must stay home for 14 days of known exposure to COVID 19.

6) Have you traveled or been in known contact with anyone who recently traveled out of the country or to other states experiencing spikes in Coronavirus cases in the past 14 days? For participants, depending on your practice of social distancing, consider having that person reschedule for another time. Staff may be required to stay home for 14 days post trace.
